

Bring Science Alive!

Idaho-Approved for Statewide Use

Empower your students on their journey to a lifelong love of science with TCI's award-winning K-8 science programs. TCI classrooms are active, immersive spaces where students confidently question and explore the world as scientists do.

TCI[™]

Fully Aligned with Idaho Content Standards for Science

TCI's K-8 *Bring Science Alive!* programs are aligned with Idaho Content Standards for Science, ensuring students develop the skills they need to understand, practice, and excel in science.

- **Three-dimensional learning:** Programs cover key disciplinary concepts, engages students in science and engineering practices, and helps them make connections across scientific ideas through crosscutting concepts.
- **Hands-on investigations:** Students deepen their understanding through hands-on investigations that encourage exploration, experimentation, and discovery.
- **Compelling phenomena:** Anchoring and local phenomena engage students and help them explore, explain, and understand the world around them.

Empower Student Engagement Through Active Learning

TCI's high-quality programs transform K-8 science classes into dynamic, interactive experiences that drive engagement and learning.

- Easy-to-adapt investigations
- Storyline-driven units
- Performance assessments
- Engineering challenges
- Math and ELA integration
- Support for all learners
